Product Overview of LCN Light Cured Resins

LCN resins are compatible with each other and allow for personalized application for your client. Below you will find the recommended combination of products according to nail type.

Normal, Strong Nails

First modeling (tip or form)

Bonding	Bonder ^{NEW}
Extension	Sculpture Formatur or Tip
Modeling	Sculpture (all variants possible)
Sealing	Any Sealing or Glaze Gels

Refill

Bonding	Bonder ^{NEW} or Bio Bond
Modeling	One Component Resin F
Sealing	Any Sealing or Glaze Gels

Dry, Brittle Nails

First modeling (tip or form)

Bonding	Connex Plus and Bonder ^{NEW}
Extension	Sculpture Formatur or Tip
Modeling	Sculpture (all variants possible)
Sealing	Any Sealing or Glaze Gels (according to desired effect)

Refill

Bonding	Connex Plus or Bio Bond
Modeling	One Component Resin F
Sealing	Any Sealing or Glaze Gels

Weak, Oily, Flexible Nails

First modeling (tip or form)

Bonding	Base Gel
Extension	Sculpture Formatur or Tip
Modeling	One Component Resin F (all variants possible)
Sealing	Any Sealing or Glaze Gels (according to desired effect)

Refill

Bonding	Base Gel
Modeling	One Component Resin F or Bondique (for very weak nails)
Sealing	Any Sealing or Glaze Gels

Damaged Nails

First modeling (tip or form)

Bonding	Base Gel
Extension	Sculpture Formatur (max. 1/3 of the nail bed)
Modeling	One Component Resin F
Sealing	Sealant or Glaze Gels (according to desired effect)

Refill

Bonding	Base Gel
Modeling	One Component Resin F or Bondique
Sealing	Any Sealing or Glaze Gels

List of Products & Applications for LCN Light Cured Resins

	Product	Viscosity	
BONDING	Bonder ^{NEW}	••-	Light cured standard bonding agent, solvent free
	Base Gel	••+	Light cured, slightly acidic, extreme bonding, solvent free
	Connex Plus	•	Air-dry (60 seconds) adhesion facilitator contains alcohol/water & anti-mycotics
	Solution2 Base & Closing Gel	••	Light cured, solvent free, outstanding bonding effect, high gloss finish
	Bio Bond	••	Light cured bonding agent enriched with nourishing ingredients & anti-oxidants
SCULPTING	Bondique	•••	Bonds to nail / tip, elastic, self-leveling properties, limited sculpting properties
	Fibrique Express Repair	•••	Reinforced with fibres, cannot be sculpted, bonds to nail / tip
	One Component Resin F	••••	Bonds to the nail/tip. Elastic, good leveling properties, can be sculpted
	Sculpture F	•••••	Thick, can be sculpted extremely well, does not flow
	Sculpture Formatur Design	•••••	Thick, can be sculpted extremely well, does not flow
	Wilde-Pedique Plus	•••	Highly elastic AM gel for toenail prosthesis/securing an ingrown toenail brace
	Solution ² - Building Gel	••••	Natural look, easy application medium viscosity, good leveling properties
SEALING	Sealant	••	Standard sealant, high gloss, scratch resistant surface
	Ultra Shine	••	Extra shine UV-protection for Colour Gels, Nail Art & all other nail enhancements.
	High Gloss	••	Extreme Shine with UV-Protection. No dispersion film.
	Solution ² Base & Closing Gel	••	Solvent free, outstanding bonding effect, high gloss finish
	PediSeal	•••	Elastic, light-cured sealing gel for toenail cosmetics with UV-protection
FRENCH	FM Pearl White	•••	
	FM Pearl White Brush-on	•••	
	Sculpture Formatur	••••	French design resins ranging from smooth self-leveling gels to sculpting paste-like consistencies. Shades range from snow white to natural white.
	Sculpture Formatur Naturelle	••••	
	Glaze Gel French Top	••+	
	Filler Phasique	•••	
EFFECTS AND COLOURS	Camouflage Gels	••••	Colour Gels, Glitters, Effects & more! A variety of consistencies ensures you will have exactly what you need for any kind of nail embellishment ranging from discreet to extreme glamour. LCN Light Cured Resins

Bonding

Bonder^{NEW}
1001-...

Bonder^{NEW} is the result of intense research and development. It is characterized by its degree of elasticity and simultaneous strong durability while being free of acid. Bonder^{NEW} is very compatible both with the natural nail and the light-curing LCN resins. The macromolecules used in this product guarantee optimum adhesion. Bonder^{NEW} creates adhesion between the natural nail & artificial nail. It is the first step in the Classic LCN 3 step system: Bonder^{NEW} - Sculpture - Sealant.

Application:

Apply a thin coat over natural nail (& tip). Cure in light unit. Follow with Sculpture to create your artificial nail. If sculpting with nail forms apply to natural nail only.

Option:

Bonder^{NEW} can also be used under any LCN Sculpting/Building resin for additional adhesion and lift prevention.

21044	5 ml	\$ 19.00
21045	15 ml	\$ 41.00
20005	100 ml	\$239.00

Bio Bond
1001-...

Unique in its characteristics, Bio Bond provides superior bonding properties while strengthening the natural nail. This anti-oxidant formula is enriched with urea & specially derived L-cysteine containing keratin forming & strengthening amino acids.

Application:

Apply a thin coat over the natural nails & tips. Cure in light unit. Follow with the light cured building resin of your choice. If using nail forms apply to natural nails only.

20546	10 ml	\$ 39.00
-------	-------	----------

The Universal Solution for Problem Nails with Base Gel

The use of LCN Base Gel is recommended for:

- Oily and very moist nails - For nails which tend to lift despite the most careful treatment.
- For the treatment of nails that were previously treated with products containing acidic primer or clients wearing acrylic nails.
- Clients in transition to a gentler, safer nail enhancement system which meets the highest standard of health, such as LCN.

Application:

- 1) Prepare the nail as usual. Remove all shine, dirt, dust and debris then wipe with LCN Cleaner.
- 2) Using a sculpting brush, apply a thin layer of Base Gel onto the nail plate (and tip). Cure this layer in the light unit.
- 3) Do not wipe. Apply the chosen LCN Building or Sculpting Resin and Sealant to the nail curing between each layer.

20576	10 ml	\$ 39.00
-------	-------	----------

Connex Plus – AM Factor

1001-...

Air-dried bonding agent containing the AM (Anti-Mycotic) agent Octipirox. Connex Plus is non-acidic and increases the bonding capacity of all light curing resins. Ideal for use on toenails with Pedique Plus due to the AM (Anti-Mycotic~Anti-Microbial) factor.

Application:

Apply sparingly to the nail plate (near the cuticle line only) using the specially designed Connex Brush. Allow to air-dry for 1 – 2 minutes to a chalky finish. Follow with your choice of building resin or Pedique Plus.

20113	5 ml	\$ 18.00
-------	------	----------

Solution², Base & Closing Gel

1001-...

A 2 in 1 product for both bonding and sealing. This extremely effective Bonding Gel also can be used to seal the nails leaving a natural shine.

Application:

After preparing the natural nail, apply a thin coat of Solution2 Base & Closing Gel over the nail (& tip). Cure in light unit. Follow with Solution2 Building Gel. To seal, apply a thicker layer of Solution2 Base & Closing Gel over the nail (including free edge). Cure then wipe with a dry cotton swab for shine.

20626	10 ml	\$ 33.00	20628	40 ml	\$ 99.00
-------	-------	----------	-------	-------	----------

Sculpting

Sculpture F

1001-...

Build the perfect nail with optimal strength and maximum flexibility. Non-self leveling building formula will not run into the sidewall of the nail.

Clear	Pastel	Size	
20016	20306	5 ml	\$ 19.00
20008	20307	25 ml	\$ 73.00
20009		50 ml	\$129.00

One Component Resin F

1001-...

A favourite of Nail Technicians world wide! This universal 3-in-1 gel resin contains 100% all around properties of Bonding, Building & Sealing.

Clear	OCR Crystal Clear	Pink	Pastel	Size	
20037		20125	20316	5 ml	\$ 15.00
20038	20678	20228	20317	20 ml	\$ 39.00
20042				40 ml	\$ 69.00
20039		20209		100 ml	\$137.00

Bondique

1001-...

Highly elastic one-step self-leveling system provides extremely strong bonding & building properties as well as the ability to seal the nail with a matte finish.

Application:

- 1) Apply a thin layer of Bondique onto the natural nail (and tip). If working with a form, apply to natural nail only. Cure in light unit.
- 2) Apply a second layer of Bondique to create the nail shape (if using a nail form, pull second layer of Bondique over the nail plate and your free edge resin such as Sculpture Formature. Cure in light unit. If necessary, wipe with Cleaner then file and buff nails into final desired shape. Remove all dust.
- 3) Apply a final layer of Bondique (or your choice of Sealant) to the nail (including the free edge). Cure then wipe with a dry cotton swab for shine.

20068	5 ml	\$ 15.00	20066	40 ml	\$ 69.00
20065	20 ml	\$ 36.00	20067	100 ml	\$137.00

Fibrique Express Repair

1001-...

Infused with strengthening micro fibers, this bonding and building resin is ideal for the reinforcement and repair of natural and problematic nails. Due to the textured nature of the micro fibers, a sealant must be used (after buffing) as the final step.

Application:

- 1) Apply a thin layer of Fibrique Express Repair onto the natural nail (and tip). If working with a form, apply only to the natural nail. Cure in light unit.
- 2) Apply a second layer of Fibrique Express Repair (if desired) to create the nail shape and cure. Wipe with LCN Cleaner, buff and finish with sealant.

20653	5 ml	\$ 15.00	20655	40 ml	\$ 63.00
20654	20 ml	\$ 37.00			

Solution² Building Gel

1001-...

A technicians dream, this building resin is the latest in light-cured technology. Curing to the touch during the nail service yet taking final shape within 24 hours. Solution2 gradually sets to the natural nail, yet remains resilient to alleviate client discomfort on very thin or stressed nails.

Clear	Clear F	Pink	
20629		20661	15 ml \$ 31.00
20631	20633		50 ml \$ 89.00

Sealing

Sealant

1001-...

The final step in LCN's classic 3-step system. This high shine formula 100% seals the artificial nail providing waterproof protection and a scratch resistant high gloss surface. This is a glossy finish available in 4 shades.

Clear	Pink	Opak	Pastel		
20032	20132	20054	20344	5 ml	\$ 19.00

The Coloured Light Curing Polish High Gloss

LCN High Gloss Colours and High Gloss Clear Sealant consist of a different formulation than regular LCN Colour Gels and Sealants. Because of this, please use the following application steps:

Application of High Gloss Colours:

- 1) High Gloss is used after the application of any LCN Building Gel.
- 2) Once the nail is shaped and buffed do NOT clean with Cleaner, only remove excess dust.
- 3) Apply a very thin (like scraping the surface) with a thin brush (example LCN Protech 1 brush) and cure for 2 minutes.
- 4) Once cured, apply a second thin layer. Ensure you seal the free edge properly to prevent splitting.
- 5) Once cured, do not wipe. You now have a beautiful high gloss shine.

Please Note:

- Generally a thin application is essential.
- Layers which have been applied too thick tend to lift quicker due to the more intense polymerization process.
- High Gloss Gels are not soluble and are not comparable with soak-off systems.
- High Gloss is not suitable for an application on the natural nail.

High Gloss

1001-...

20692	High Gloss Colours			10 ml	\$ 29.00
20691	High Gloss Clear			15 ml	\$ 38.00

Apply with sculpting brush. Choose from 5 beautiful colours.

French Free Edge Enhancers

FM, Pearl White

1001-...

After sculpting the nail, use FM Pearl White for a crisp white free edge enhancement. Not suitable for sculpting.

20233	5 ml	\$19.00	20236	100 ml	\$243.00
20231	15 ml	\$49.00			

French Sculpting

Sculpture Formatur

1001-...

Build strength and style with three shade options of LCN's most flexible, break resistant white free edge sculpting resin. Non self leveling formula stays put!

White	Naturelle	Noble Sparks			
20159	20096	20633-1	5 ml		\$ 19.00
20047	20069		25 ml		\$ 73.00

Filler Phasique White

1001-...

Flexibility and strength make this self leveling white free edge building gel ideal for a fill.

20600			20 ml		\$ 43.00
-------	--	--	-------	--	----------

Glaze Gels

Glaze Gel

1001-...

Glaze Gels add a touch of colour to the finished nail before sealant application. Thick viscosity prevents running into the cuticle or sidewalls. Apply evenly in a very thin layer. Sealant of your choice must be applied over all Glaze Gels.

Elegant Line

The elegant line replicates a classic "Nude Look" French.

Effects & Colours

Glass Gels

1001-20708-...

LCN Glass Gels have a firm texture and can be individually sculpted and thinly worked according to the desired colour intensity. Fantastic designs can be embedded into the modelling using heart or diamond-shaped or even abstract templates. These designs shimmer faintly through the transparent LCN Glass Gels, enhancing their appearance.

\$ 15.00

How to use a 3D Gel Form

- Choose desired form and LCN 3D Colour Gel
- Using Spot'N'Swirl or brush place the 3D Colour Gel into the chosen form. (Try marbling more than one colour for a truly unique, customized design)
- Place Form into the light unit to cure
- Cure for 30 seconds for a flexible design that can be shaped to the nail OR cure fully for two minutes for a firmer true 3D effect
- Once cured, to release the design gently twist the form (much like you would an ice cube tray)
- Position the design onto the artificial nail
- Apply a generous layer of Sealant and cure for 2 minutes
- Wipe with LCN Cleaner and you are finished!

3D Gel is featured on You Tube. Please check out: WildeCosmetics Channel

Olive Care

European Luxury for Hands & Body

In ancient times the olive was considered a present from the gods with healing properties. Even the earliest records of Hebrews, Egyptians, Greeks & Romans speak of the oil being used for body care.

Olive Oil is full of antioxidants to provide strong anti-aging properties. A nourishing moisturizer delicate enough for sensitive skin. Great for daily skin and body care.

Olive Hand & Body Oil

Moisturizing Hand & Body Oil infused with Squalene and Tuscan Olive Extracts. Oil can be used as massage oil, bath oil, or as an addition to enrich a neutral cream.

		Salon	Retail

The Light Cured Concept for French Pedicures, Permanent Polish and Toenail Reconstruction

The only light cured material for the restoration and correction of toenails that contains the anti-microbial agent Piroctone Olamine.

With over 25 years of research and manufacturing experience in the field of synthetic materials for fingernail cosmetics, LCN developed Pedique to be an elastic one-step system, which has the ability to adapt to the foot's movements and provide protection in the moist foot environment .

Pedique's adhesive qualities ensure secure adhesion, even to calloused skin. Pedique is ideally suited for protecting and sealing toenail surfaces, leveling grooves and deformations, concealing discolorations, strengthening toenails and sealing ingrown toenail braces.

Pedique is available in various shades and is applied to the cleansed skin and/or oil free nail. It is hardened with a special UVA light unit.

Pedique Plus

Contains the antimicrobial agent Piroctone Olamine. This light-cured resin with excellent bonding and maximum flexibility is ideal for creating a beautiful French Pedicure look.

Pediseal

Elastic, light-cured sealing gel for toenail cosmetics with added UV-protection. Flexible to adjust to the movement of the foot and is the ideal supplementary product for the highly elastic Pedique Plus. The gel can be easily applied even where it is difficult to treat furrows and does not run into the sidewall of the nail. The UV-protection stabilizes the permanent french design and protects the coloured variants of Pedique Plus against extreme exposure to sunlight.

What Makes LCN Pine Resin Wax So Unique?

Advantage of Pine Resin?

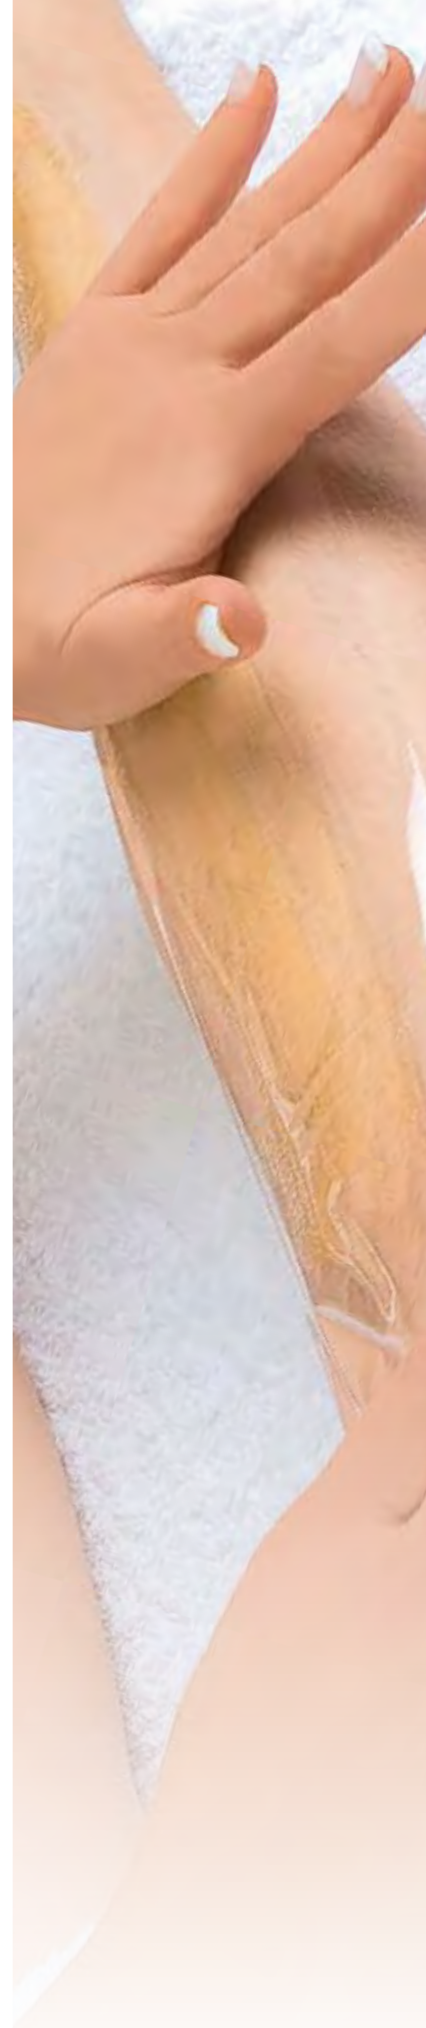

- Pine Resin removes hair effectively, leaving the skin virtually "sticky" residue free.
- Lower risk of allergic reaction – pine resin is plant based.
- Lower risk of ingrown hairs, break-outs and infection – pine resin has no Glucose or Sucrose (sugar) base.
- Lower risk of redness and itching – pine resin is extracted from plants. Industrial honey, although refined, has been known to have trace elements of bee venom.
- Hard Wax – Contains Azulene. Does not require strips and does not stick to the skin, reducing discomfort. Recommended for delicate areas such as bikini, underarms, or upper lip.
- All Purpose & Azulene Wax – Designed for coarser hair or oily and moist skin types. Azulene is added to help calm sensitive skin and to prevent redness.
- Natural Cream & Tea Tree Wax – Cream wax options designed for finer hair and sensitive, dry/dehydrated skin types. Tea Tree is added as a natural antiseptic, aiding in prevention of ingrown hairs as well as facial and body break-outs.

Azulene:

Derivative of the Chamomile Plant that has anti-inflammatory and soothing properties.

Tea Tree:

Comes all the way from the Australian outback. It is derived from the leaves of the Melaleuca Alternifolia. Tea Tree oil is widely recognized for having antibacterial, anti-inflammatory, and antiseptic properties.
